This year attendees have an opportunity to choose from one of two different learning paths:

- Path 1: Odysseyware Basic Foundations:** From getting started to individualizing content. Whether you are new to Odysseyware or an experienced user looking to brush up on foundational skills, this path focuses on the basics of using Odysseyware. Learn how to navigate, monitor your students, create basic custom courses, prepare individualized content, and apply these strategies in the hands on workshop at the end of the day.
- Path 2: Using Blended Learning to Meet Individual Learning Needs:** Address unique student needs using Odysseyware's built-in curriculum and support tools to differentiate instruction and support your individualized education programs. In addition, examine specific strategies for adding different blended learning models to your current curriculum toolbox - including Rotation, Flex, Enriched Virtual, and Self Blend as another way to meet the varying needs of today's students.
